MedOne ComSci: Cases

When it comes to applying information in a clinical setting, cases are invaluable for transitioning knowledge into practice. Each real case walks readers through history, testing, questions, diagnosis, treatment, and reading, so students can learn to handle patients. Online-first cases mean instructors can teach the most contemporary information without a delay between the screen and the real world.

Case Titles	
Audiology	Speech-Language Pathology

MedOne ComSci: Media

The databank of images, videos, and audio clips on MedOne ComSci lets students and instructors expand their access to quality resources. Before a lecture or presentation, users can search for images, download one or more at a time, and create course materials complete with legends and sources. For at-home studying or in-class examples, users can compare audiometric testing or listen to verbal drills.
