

Thieme Teaching Assistant Anatomy

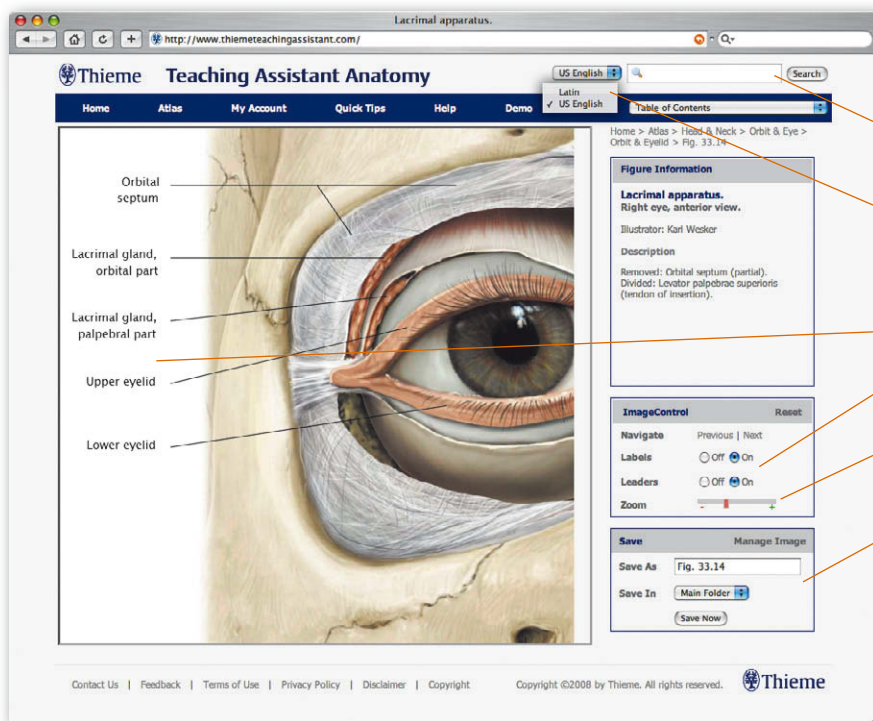

2000+ stunning illustrations for presentations, course materials, and assignments

The Thieme Teaching Assistant Anatomy

is a new presentation tool featuring all 2000+ illustrations and clinical images from Gilroy et al.'s Atlas of Anatomy in one cutting-edge platform.

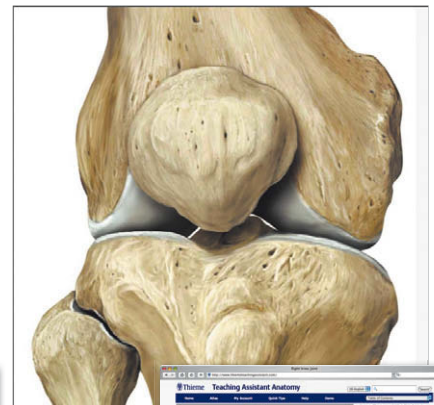

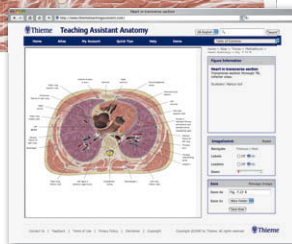

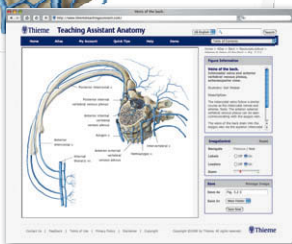

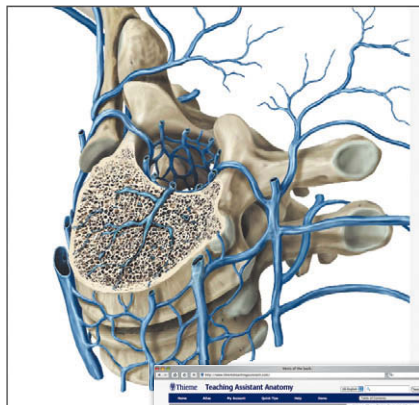

Lecturers can enhance their students' learning experience by incorporating dynamic visuals into their lectures and course materials to present complex concepts with unprecedented clarity.

Students can use the excellent images for studying, review and self-assessment.

The Thieme Teaching Assistant Anatomy allows lecturers & students to:

- Locate specific images using the search function
- Choose between English and Latin labels
- Turn individual labels and leader lines "on" or "off"
- Zoom in on images with an amazing level of clarity
- Export edited images as image files or pre-embedded in Power-Point slides or PDF files

The **Thieme Teaching Assistant Anatomy** is an ideal companion to the Thieme E-Book library, the acclaimed collection of Thieme textbooks for learning, review and research. It is available as a sitewide license allowing all lectures & students at your institution to lift their teaching & learning experience to a new, unprecedented level.
